

Owden Magnusen

Software Engineer |
Concert Visuals Designer

About me

Backend software engineer with 5 years of experience building scalable systems using Python, Flask, and Django. Proficient in MySQL, Google Cloud, and Docker, with a focus on clean code, secure APIs, and reliable performance. Strong team player committed to continuous learning and delivering high-quality backend solutions.

Education:

Bachelor of Science in Computer Science | Will graduate in November 2027

Work Experience:

Adinkra Ino-v8

Design and Development Associate |
Feb 2025 - May 2025 | Contract

- Developed systems integrating Google Drive and Google Docs APIs with Flask and Django to seamlessly read and write data from Google Sheets. Designed an admin dashboard for data management, incorporating database CRUD operations and analytical features to generate insights and summaries for administrators.
- Built and maintained systems for guest services.
